

Dear Customer,
 Congratulations and thank you for purchasing an Arto Design product.

Prior to installation it is important to unpack and inspect all items to be installed to ensure that no damage has occurred during transit and that the item is correct before installation. If there are any visible defects DO NOT PROCEED WITH INSTALLATION. No claims for damage will be recognized after installation.

Please leave copy with client for information and cleaning instructions.

Installation Instructions

1. Installation should only be carried out by a licensed tradesperson.
2. Remove doors and drawers (if necessary) and store in a safe place.
3. Check that the wall is level and plumb both vertically and horizontally (Fig 1 & 2). **Your vanity must be level otherwise it may twist and your doors and drawers will be out of alignment. Pack out where necessary.**
4. Fit legs / kicker to cabinet or check for sufficient support for wall hung vanity units.
5. Mark and drill base and back of vanity for water and waste pipes.
6. Position and fix vanity to wall and check that vanity unit is level and square (Fig 3 & 4)

Fig.1

Fig.2

Fig.3

Fig.4

7. Re-attach drawers and doors and adjust as required.

*** Installation is not complete until Drawers and Doors adjustments are completed. Adjustments are not covered under warranty.**

Height adjustment

Side adjustment

Depth adjustment

Soft Close Runners

8. Fit tapware and waste to vanity top or basin. **(as per Mixer & Waste Installation Instructions)**
9. Completely silicon top to cabinet using non-acid mould resistant silicone. All areas need to be sealed to prevent water penetration. The cabinet is water resistant – **Not waterproof.**
10. It is strongly recommended that the vanity unit be installed at minimum 300mm from any wet area such as baths, spas or showers. **(installation within this measurement will Void Warranty)**

Installation Instructions—Continued

11. When a separate basin is fitted to a stone top it is essential that the basin is completely sealed to the top to prevent any water penetration. **(as per Basin Installation Instructions)**
12. Completely seal the cabinet using a flexible silicone sealant to the wall.
13. When installing with a kicker either pack up the kicker off the floor or completely seal the cabinet using flexible silicone sealant to the floor to prevent any water penetration into the cabinet.
14. Connect tapware and waste and test accordingly.

Cleaning and Maintenance

Cabinets – Use warm soapy water and a soft cloth and dry immediately.

Polymerable Top - Use warm soapy water and a soft cloth and dry immediately. Surface scratches will buff out using a quality vanity polish.

Vitreous China Top - Use warm soapy water and a soft cloth and dry immediately. It is advisable to avoid thermal shock to first run cold water into the bowl adding hot water to reach the desired temperature. **Do not overtighten tapware or waste fittings as this will create a stress fracture in the top.**

Stone Top – Use warm water and a soft cloth and dry immediately. For extra stubborn spills we recommend using a non-abrasive cream cleanser and if necessary a non-abrasive soft bristle brush. Methylated spirits is also ideal – it doesn't leave streaks.

WARRANTY		
Vanities & Basins - Domestic	1 YEAR Labour for product fault. Does not include door and drawer adjustment. Does not include instances where faulty / damaged goods have already been installed, or water leak causing damage to cabinetry.	
Vanity (Cabinet)	5/1 Years	5 Year Parts and Product
Vanity (Including Top)		First Year Labour

Major reasons why Vanities show water damages are:

Poorly or incorrectly installed Tapware and wastes/traps, (these should be properly tested and checked after a month of normal use to make sure leaks have not occurred). Installation to close to a heavy wet areas, Shower Cubicle, Spa, or Bath. Also leaving wet objects on top of Vanities e.g. Towels, Buckets or Bowls with water (or other fluid) in them. All Arto Vanities are made from Water Resistant Product, they can handle normal use but need to be kept clean and free of excess water.
